

# SCHMOLZ + BICKENBACH

Comprehensive range of  
tool steel solutions

## Our star products dedicated to the most stringent markets

### Cold works:

- » CRYODUR® 2990 the innovative steel for sheet metal working
- » CRYODUR® 2767 with high hardenability and toughness, highly suitable for polishing, texturing and EDM machining
- » CRYODUR® 2746 the special steel for cold-shear blades, particularly for cutting scrap

### Hot works:

- » FX-XTRA® Versatile forging die material for both shallow and deep impressions. Excellent high temperature properties make this a true workhorse
- » THERMODUR® E 40 K Superclean effectively slows down formation of hot cracks for light metal die casting
- » THERMODUR® E 38 K Superclean with excellent toughness and low susceptibility to hot cracking
- » PRESS-DIE ® precipitation hardened alloy with excellent resistance to heat checking
- » CX ® excellent ductility and toughness for warm and near-net shape forgings; ram and sow blocks
- » THERMODUR® 2383 Supercool for press hardening with excellent thermal conductivity

### High Speed Steel:

- » RAPIDUR® 3343 the best choice for all metal-cutting tools
- » RAPIDUR® 3207 High-speed steel of superlative performance combining optimal cutting-edge retention, high-temperature strength and toughness

### Plastic mold:

- » MLQ® / SF-2000™ LQ an excellent material for Photo-Etching & Texturing. The VAR or ESR process eliminates nearly all segregation
- » FORMADUR® 400 Superclean an ESR remelted mould steel with excellent polishability and texturing properties
- » MD™ Xtra / SF-2050™ mould steels for maximum hardenability in large plastic injections moulds
- » CORROPLAST® the corrosion-resistant steel with best machinability
- » CORROPLAST® FM ultimate corrosion-resistant steel with excellent machinability
- » FORMADUR® PH X Superclean stainless steel that sets polishability standards
- » 420Q a superior product for molding vinyl base or other corrosive plastics. It can be used for injection, compression and transfer molding

### Powder metallurgy:

- » Fe-, Ni- and Co-Basis
- » PM-Steel, especially cold work and high speed tool steels
- » Powder for additive manufacture, “3D-printing”
- » Ferro-Titanit® metal matrix composite with titanium carbides for high wear resistance

### Special products:

- » Open die casting
- » Aluminum die casting
- » Aluminum extrusion
- » Plastic mold
- » Glass mold
- » Mandrel bars
- » Cold rolls

## SCHMOLZ + BICKENBACH Group

---

SCHMOLZ + BICKENBACH is a leading global producer of special long steel with operations around the world. The independent Group has an integrated business model built around the Divisions Production and Sales & Services which allow SCHMOLZ + BICKENBACH to leverage strategic and operational synergies.

**Production – specialized steelmaking, forging and rolling plants in Europe and North America; drawing mills, bright steel production and heat treatment in northern and western Europe and Turkey.**

Our Production Division encompasses the business units Deutsche Edelstahlwerke, Finkl Steel, Steeltec, Swiss Steel and Ugitech, operating a total of nine state-of-the-art steelmaking plants in Canada, France, Germany, Switzerland and the USA. The steel plants complement each other in terms of formats and qualities, covering the entire spectrum for special long steel. Besides the three main product groups – tool steel, engineering steel and stainless steel – the range includes special steel products. Characteristics such as close dimensional tolerance, strength and surface quality are precisely matched to our customer's brief.

**Sales & Services – a reliable global partner in steel consulting, processing and supply**

We combine our sales activities within our Sales & Services Division, and guarantee the consistent and reliable supply and end-to-end customer solutions worldwide with around 70 distribution and service branches in more than 30 countries. These include technical consulting and downstream processes as sawing, milling and hardening, heat treatment as well as supply chain management. We pursue the goal of offering our customers global access to our products and services – with excellent quality standards and first-class service.

Such a service approach based on our state-of-the-art product range leads to long lasting relations with our customers who value us as partner in their development. We count around 100 grades in tool steel in our offering. Contact us for any special need you require in your development and your innovation process.

# Our tool steel grades and dimension range

- » We offer more than 100 grades dedicated to the most specific applications. We are covering all the tool steel families: cold works, hot works, high speed steel, plastic molds, powder metal steel and of wide range of special products.
- » Thanks to our state of the art Research and Development centers, we also work in collaboration with our customers to develop new products for special steel needs.
